2.3.7. Teaching learning process nurtures creativity. Innovativeness, intellectual and thinking skills, empathy, life skills etc. among students.

Teachers of Dr. Radhakrishnan College of education given training to students to enhance their creative aspects. The college plays an active role in training the faculty as well as students also to enhance various skills of creativity. The innovative technique of teaching used by faculty which supports students to enhance their intellectual and thinking skills.

The various innovations are;

- Creative a healthy competitive environment.
- Accepting new ideas.
- Prize and certificate for innovative works.
- Give student direct feedback on their creativity.

Innovation in education encourages teachers and students to explore, research and use all the tools to uncover something new. It improves thinking process and problem solving quality. It will help students to develop their creativity and their problem solving skills.

College conducts life skills programmes like swachhata abhiyan .Road accident based programme. Intellectual and thinking skills based programme like art and craft workshops create , discussions for students into practice develop e their own views on classroom content.

Creativity and innovation are fundamental to all disciplines and an essential part of the learning process, forming an important dimension of learning how to learn. They are also fundamental to teachers improving their professional.

Learning involves challenging. Refining and improving understanding by being made to think hard sometimes, to understand new concept and broaden perspectives. our approaches to thinking need to be creative, imaginative and lateral. as well as linear. One characteristic of the creative process that make it particularly powerful is that it requires not only knowledge and understanding of

the domain being investigated, but also they can question and not be constrained by existing knowledge. Learners should understand how they can question or challenge established knowledge to help them to formulate their own understanding, and imagination can play an important role; 'One cannot think creativity unless one has the knowledge with which to think creativity. Creativity represents a balance between knowledge and freeing oneself of that knowledge'.

In life skills education ; - Students are activity involved in a dynamic teaching and learning process . The methods used to facilitate this active involvement include working in small group and pairs, brain storming, role play, games and debates.
